

Application Description

Need a change from unhealthy food habits? No need to worry, the Photo Cal app is the one for you! With eating habits in today's society having gone haywire, we are more prone and depicted to junk food rather than healthy food. Due to this, many of us today are becoming unhealthy and even overweight. In order to stop this overeating and keep an eye on the account of calories we intake, the Photo Cal application can help keep track of an individual in order to live a better and healthier lifestyle than before. Photo Cal will not only help make people more aware of their health but also make them conscious of their eating habits and how they're affecting them. With its flexibility, ease of use, and stress-friendly components, you don't have to struggle to find what you are looking for. You'll not only enjoy a simple and quick way to track calories, but you'll also learn how to maintain and eat healthier, plan meals, and understand your body more as you progress in your daily tracking. Simply take a picture of the food you are eating and label them as you go. With Photo Cal you will be in shape in no time!
